Two-Digit Subtraction

Without regrouping

Student workbook · Grades 1–2

Eight teaching images

40 practice questions · 20 homework questions

School of Math · New York

CLASS 14 • TWO-DIGIT SUBTRACTION WITHOUT REGROUPING

1. Understanding Subtraction

Take away a part to find how many remain.

$$28 - 15 = 13$$

Start with

Take away

Remain

28 altogether

15 taken away

13 remain

At the school fair

There are 28 tickets.
Students use 15 tickets.
How many tickets remain?

$$28 - 15 = 13$$

tickets

Difference

The difference is the answer to a subtraction problem.

Key Idea

Whole – part = remaining part

Image 1 practice: Understanding subtraction

Q1. Start with 25 counters and take away 12. How many counters remain?

Q2. Write and solve a subtraction sentence for "37 take away 14."

Q3. A tray holds 48 beads. You remove 26 beads. How many stay on the tray?

Q4. In $69 - 35$, what is the starting amount, what is taken away, and what remains?

Q5. A box holds 87 blocks. After 43 are taken out, is the number left greater than 40? Find the difference to explain.

2. Reviewing Tens and Ones

Every two-digit number has tens and ones.

$$47 = 40 + 7$$

Tens	Ones
4	7
4 tens = 40	7 ones = 7

47 is 4 tens and 7 ones.

A digit's place tells its value.

In 47, the 4 is worth 40.

In 47, the 7 is worth 7.

More examples

$$36 = 3 \text{ tens} + 6 \text{ ones} = 30 + 6$$

$$50 = 5 \text{ tens} + 0 \text{ ones} = 50 + 0$$

Key Idea

1 ten = 10 ones

Understanding place value helps us subtract tens from tens and ones from ones.

Image 2 practice: Reviewing tens and ones

Q6. How many tens and ones are in 64?

Q7. Write 82 as tens and ones, then as an addition sentence.

Q8. In 73 and 37, what is the value of the digit 7 in each number?

Q9. Start with 8 tens and 6 ones. Take away 3 tens and 1 one. What number remains?

Q10. A student writes $92 - 41 = 15$ after mixing up the tens and ones. What is the correct answer?

3. Subtracting with Models

Use place-value counters to take away tens and ones.

$$23 - 11 = 12$$

1. Start with 23

2 tens and 3 ones.

2. Take away 11

Cross out 1 ten and 1 one.

3. Count what remains

$$10 + 1 + 1 = 12.$$

Green counters
represent tens.

Gold counters
represent ones.

Key Idea

Subtract tens from tens and ones from ones.

Image 3 practice: Subtracting with models

Q11. Draw tens and ones to show $34 - 12$. Cross out what you take away and write the difference.

Q12. Draw tens and ones to show $45 - 21$. Cross out what you take away and write the difference.

Q13. Draw tens and ones to show $57 - 34$. Cross out what you take away and write the difference.

Q14. Draw tens and ones to show $68 - 45$. Cross out what you take away and write the difference.

Q15. Draw tens and ones to show $96 - 52$. Cross out what you take away and write the difference.

4. Aligning Numbers

Write tens under tens and ones under ones.

1. Align the numbers

$$58 - 23$$

- 1** 5 and 2 belong in the tens column.
- 2** 8 and 3 belong in the ones column.

	Tens	Ones
	5 ↓	8 ↓
-	2	3

2. What if we subtract a one-digit number?

$$46 - 5$$

- 1** Write 5 under 6 because both are ones.
- 2** The tens space below 4 stays empty.

	Tens	Ones
	4 ↓	6 ↓
-		5

Key Idea

Line up place values before you subtract.

Image 4 practice: Aligning numbers

Q16. Write $49 - 7$ vertically. Which digit should the 7 go under? Then subtract.

Q17. Write $65 - 24$ in tens and ones columns, then solve it.

Q18. Write $78 - 43$ vertically. Name the two digits in the tens column, then solve.

Q19. A student puts the 5 in 56 under the 9 in 89. Explain the alignment mistake, then solve $89 - 56$.

Q20. Set up $97 - 62$ vertically. Explain where each digit of 62 belongs, then find the difference.

5. Subtracting the Ones

Start with the ones column on the right.

1. Subtract the ones

$$58 - 23$$

- 1 Find the ones: 8 and 3.
- 2 Subtract: $8 - 3 = 5$.
- 3 Write 5 in the ones place.

$$8 \text{ ones} - 3 \text{ ones} = 5 \text{ ones}$$

Leave the tens for the next step.

	Tens	Ones
	5 ↓	8 ↓
-	2	3
		5

2. When is regrouping unnecessary?

When the top ones digit is greater than or equal to the bottom ones digit.

Greater than

$$8 > 3$$

$$8 - 3 = 5$$

Equal to

$$6 = 6$$

$$6 - 6 = 0$$

If the ones digits are equal, write 0 in the ones place.

Key Idea

Subtract the ones first. Keep your answer in the ones column.

Image 5 practice: Subtracting the ones

Q21. For $56 - 13$, write the ones subtraction first. Then finish the problem.

Q22. For $77 - 25$, how many ones remain? Then find the whole difference.

Q23. Subtract $68 - 38$. Explain why the answer needs a zero in the ones place.

Q24. A student writes $84 - 42 = 24$. Subtract the ones and tens separately to correct the answer.

Q25. Fill in the missing ones digit: $9? - 54 = 42$. What is the starting number?

6. Subtracting the Tens

After subtracting the ones, subtract the tens.

1. Subtracting the tens

$$58 - 23$$

- 1 The ones are done:
 $8 - 3 = 5$.
- 2 Subtract the tens:
 $5 - 2 = 3$.
- 3 Write 3 in the tens place.

$$5 \text{ tens} - 2 \text{ tens} = 3 \text{ tens}$$

	Tens	Ones
	5 ↓	8 ↓
-	2	3
	3	5

2. Read the whole answer

$$3 \text{ tens} + 5 \text{ ones} = 35$$

$$58 - 23 = 35$$

The difference is thirty-five.

3. Another example

$$76 - 42 = 34$$

$$\text{Ones: } 6 - 2 = 4$$

$$\text{Tens: } 7 - 4 = 3$$

3 tens and 4 ones make 34.

Key Idea

Ones first, then tens. Read both digits together.

Image 6 practice: Subtracting the tens

Q26. Subtract $63 - 20$. Why does the ones digit stay the same?

Q27. Subtract $75 - 31$. How many tens and ones are in the answer?

Q28. Subtract $88 - 46$. Explain what the tens digit in your answer is worth.

Q29. Subtract $94 - 70$. Write the answer as tens and ones.

Q30. Fill in the missing tens digit: $?7 - 32 = 45$. What is the starting number?

CLASS 14 • TWO-DIGIT SUBTRACTION WITHOUT REGROUPING

7. Checking with Addition

Addition helps us check a subtraction answer.

Subtraction

$$58 - 23 = 35$$

Add the difference to the number you subtracted.

Addition check

$$35 + 23 = 58$$

We got the starting number back!

Subtract

	Tens	Ones
	5	8
-	2	3
	3	5

Check

	Tens	Ones
	3	5
+	2	3
	5	8

35 is correct because $35 + 23 = 58$.

Try another check

$$76 - 42 = 34 \quad 34 + 42 = 76$$

Key Idea

Difference + number subtracted = starting number.

If the sum does not match, check your subtraction again.

Image 7 practice: Checking with addition

Q31. Solve $42 - 11$ and write an addition sentence to check your answer.

Q32. Is $64 - 22 = 42$ correct? Use addition to explain.

Q33. A student says $86 - 53 = 43$. Check with addition and find the correct difference.

Q34. Find $95 - 64$. Then check the answer with addition.

Q35. Complete $47 + ? = 89$. Use the addition sentence to write a matching subtraction sentence.

CLASS 14 • TWO-DIGIT SUBTRACTION WITHOUT REGROUPING

8. Solving Word Problems

Use subtraction to find what remains or how many more.

Taking away: How many remain?

A class has 46 pencils.
Students use 24 pencils.
How many pencils remain?

$$46 - 24 = 22$$

Answer:

22 pencils remain.

Check:

$$22 + 24 = 46$$

Comparing: How many more?

Mia has 38 stickers.
Leo has 16 stickers.
How many more stickers does Mia have?

$$38 - 16 = 22$$

Answer:

Mia has **22** more stickers than Leo.

Check:

$$22 + 16 = 38$$

Your problem-solving steps

- 1 Read and identify what you need to find.
- 2 Choose the numbers and write a subtraction.
- 3 Subtract ones, then tens.
- 4 Check with addition and label your answer.

Key Idea

Think about the situation, then choose the operation.

Image 8 practice: Solving word problems

Q36. A shelf has 55 books. Children borrow 23. How many books stay on the shelf?

Q37. There are 67 paper stars. A class uses 42 to decorate a window. How many stars are unused?

Q38. One team collects 78 leaves and another collects 35. How many more leaves does the first team collect?

Q39. A puzzle has 88 pieces. Mia has placed 26 pieces. How many more pieces must she place to finish?

Q40. A class has 99 craft sticks. It uses 34 in the morning and 22 in the afternoon. How many craft sticks remain?

Homework review: R1–R5

R1. Start with 46 shells and take away 13. Write a subtraction sentence and find how many remain.

R2. Write 72 as tens and ones. What is the value of the digit 7?

R3. Draw tens and ones for $59 - 27$. Cross out the amount taken away and write the difference.

R4. Write $83 - 61$ vertically with the columns aligned, then solve.

R5. Subtract $77 - 47$. Explain the zero in the ones place.

Homework review: R6–R8

R6. Subtract $96 - 63$. Name the tens and ones in the answer.

R7. Solve $85 - 32$ and check your answer with addition.

R8. A baker makes 94 rolls and sells 51. How many rolls remain?

Homework word problems: W1–W5

W1. A basket holds 32 oranges. Ten oranges are used for juice. How many are left?

W2. A class has 44 crayons. Twelve are put into a travel box. How many crayons stay in the classroom?

W3. A garden has 57 flowers. A gardener picks 25 for a bouquet. How many flowers remain?

W4. A store has 68 toy cars and sells 34. How many toy cars are still in the store?

W5. A library display has 79 books. Forty-six have blue covers. All the others have green covers. How many have green covers?

Homework word problems: W6–W10

W6. Sam has 86 trading cards. Ava has 51. How many fewer cards does Ava have than Sam?

W7. There were 89 balloons before a party. After some are used, 43 remain. How many balloons were used?

W8. A book has 96 pages. Nora has read 52 pages. She then reads 13 more. How many pages does she still need to read?

W9. Ben has 98 cents. He spends 35 cents on a pencil and 22 cents on an eraser. How many cents does he have left?

W10. A bus carries 87 passengers. At the first stop, 24 get off. At the next stop, 11 get off. No one gets on. Are more than 50 passengers still on the bus? Explain.

Homework word problems: W11–W12

W11. One stand starts with 78 apples and sells 23. Another starts with 96 apples and sells 42. Which stand has more apples left, and how many more?

W12. A club has 99 beads. It uses 32 for bracelets and 24 for necklaces. It needs 41 beads for its next project. Are enough beads left, and how many would remain after that project?
